This volume offers a detailed and comprehensive analysis of Endocrine Disrupting Chemicals (EDCs), covering their occurrence, exposure to humans and the mechanisms that lead to the pathogenesis of EDCs-induced metabolic disorders. The book is divided into three parts. Part I describes the physiology of the human endocrine system, with special emphasis on various types of metabolic disorders along with risk factors that are responsible for the development of these disorders. Part II addresses all aspects of EDCs, including their role in the induction of various risk factors that are responsible for the development of metabolic disorders. Part III covers up-to-date environmental regulatory considerations and treatment strategies that have been adopted to cure and prevent EDCs-induced metabolic disorders. This section will primarily appeal to clinicians investigating the causes and treatment of metabolic disorders. The text will also be of interest to students and researchers in the fields of Environmental Pharmacology and Toxicology, Environmental Pollution, Pharmaceutical Biochemistry, Biotechnology, and Drug Metabolism/Pharmacokinetics.

With fuel costs and parking charges it's no wonder the consumer is looking for less expensive forms of travel. This book is aimed at the rider who wants to do his or her own basic scooter maintenance and servicing without the need for in-depth mechanical knowledge, or a technical manual. It covers areas such as oil, brakes, tyres, transmission, electrics, etc, allowing the owner to address the most regularly serviced items without forking out for additional costs. Illustrated with full colour photographs throughout, and featuring clear, easy-to-follow instructions, this book is a must-have for scooter users.

This book investigates the geopolitics and strategic dimensions of US-American foreign policy during George W. Bush's and Barack Obama's presidential terms. Based on a vast amount of empirical and historical sources, the author offers deep insights into the recent political developments ('Arabellions') along the axis of Northern Africa, the Middle East, and Central Asia, situating them in the context of the global geopolitical and geo-economical Great Game, either latent or overt, between USA/NATO and Russia. The author also analyses the influence of the US on these historical and political processes in the last two decades.

I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

In a near-future new age of corporate control, hacker mercenaries, and electronic terrorism, a public relations executive on the rise finds herself caught in the violent epicenter of a data war Two decades into the twenty-first century, the world's nations are becoming irrelevant. Corporations are the true global powers, with information the most valuable currency, while the smaller island nations have become sanctuaries for data pirates and terrorists. A globe-trotting PR executive for the large corporate economic democracy Rizome Industries Group, Laura Webster is present when a foreign representative is assassinated on Rizome soil during a conference for offshore data havens. Dispatched immediately on an international mission of diplomacy, Laura hopes she can make a difference in a volatile, unsteady world, but instead finds herself trapped on the front lines of rapidly escalating third-world hostilities and caught up in an inescapable net of conspiracy, terrorism, post-millennial voodoo, and electronic warfare. During the 1980s, science fiction luminary Bruce Sterling envisioned the future . . . and hit it almost dead-on. The author who, along with William Gibson,

Neal Stephenson, and Rudy Rucker, helped create and define the cyberpunk subgenre imagines a world of tomorrow in Islands in the Net that bears a striking—and disturbing—resemblance to our present-day information-age reality. Nominated for the Hugo and Locus Awards and winner of the John W. Campbell Memorial Award, Sterling's extraordinary novel is a gripping, eye-opening, and remarkably prescient science fiction classic.

The inspirational success story of the first 100 years of Hutchinson Builders. What started out as a one-man band in 1912, when an English immigrant builder arrived with his family to start a new life in Australia, has grown into the country's largest privately owned construction company. The Hutchies' story straddles a century that witnessed two world wars, the great depression and tumultuous cycles of financial crises against the back drop of the rough and tumble world of construction. As well as tracking the survival and eventual growth of Hutchies into the dynamic and well respected company of today, the book outlines its evolution through successive generations of Jack Hutchinsons at the helm with a fifth generation poised to take on that role. That story is told by way of a historical account as well as captured through the republication and inclusion of every back issue of "Hutchies' Truth", the company's colourful, tabloid-style newsletter covering those years.
