In this book, the technical explanation of the nature of analog sound creation is followed by the story of its birth and its subsequent development by various designers, manufacturers and performers. The individual components of analog sound creation are then examined in detail, with step by step examples of sound creation techniques. Then the modern imitative analog instruments are examined, again with detailed instructions for programming and using them, and the book is completed with appendices listing the major instrument lines available, hints on values and purchasing, other sources of information, and a discography of readily available recordings which give good examples of analog sound synthesis. The CD which accompanies the book gives many examples of analog sound creation basics as well as more advanced techniques, and of the abilities of the individual instruments associated with classical and with imitative analog sound synthesis.

The most comprehensive, all-inclusive look at the history and evolution of shot on video horror films. In 1982, "Boardinghouse" became the first shot on video feature-length horror film ever made. Totally lensed on videotape, the film was later transferred to 16mm and blown-up to 35mm for theatrical exhibition. In 1983, David A. Prior shot "Sledgehammer" on video and eventually released the film on videotape. For the first time, analog video became the format used in motion picture productions. It was smeary, messy and it wasn't film... but it was cheap. In 1985, United Home Video boldly released "Blood Cult" with the claim it was "the first movie made for the home video market." The booming popularity of video stores coupled with a never-satisfied demand for content ensured these films longevity. Soon hundreds of titles followed, all video-created features by independent unknowns. They weren't from Hollywood. They weren't trained. But they had a lot of heart and a love for horror. And they made their own movies against the odds. For the first time EVER - "ANALOG NIGHTMARES" has brought these films together. Everything from "Boardinghouse" to "Zombie Holocaust" individually reviewed, categorized and presented chronologically by production year. Over 260 films! Featuring in-depth interviews with the filmmakers themselves - some speaking for the very first time! TIM BOGGS! MARK POLONIA! DONALD FARMER! TIM RITTER! JOEL D. WYNKOOP! DOUG STONE! ANDREA ADAMS! GARY WHITSON! DAVE CASTIGLIONE! PHIL HERMAN! ERIC STANZE! JAMES L. EDWARDS! WALTER RUETHER! TODD JASON COOK! NICK MILLARD! DAVID "THE ROCK" NELSON! RON BONK!

With MAKING MUSIC WITH GARAGEBAND AND MIXCRAFT, a significant void has been filled for anyone interested in recording music. Despite the fact that these two software programs are the leading tools used to understand the basics of MIDI sequencing and audio editing, there has never been a single resource that addressed the needs that arose when learning and navigating them. Developed as a result of this gap between what musicians want to learn and the tools that are available to do so, this book is chock full of tutorials, strategies, and clear, step-by-step instructions for both GarageBand and Mixcraft. As a result, readers can more readily expand their knowledge of these vital software programs, and more successfully pursue their passion for making music on a computer.
