Parasympathetic vs. Sympathetic Nervous System (Autonomic) Quiz. 1. True or False: The autonomic nervous system is unique because it has only one neuron that synapses in an autonomic ganglion. Hence it has only preganglionic neurons not postganglionic neurons. Answer is FALSE.

Sympathetic vs. Parasympathetic Nervous System Quiz ...

Autonomic nervous system, in vertebrates, the part of the nervous system that controls and regulates the internal organs without any conscious recognition or effort by the organism. The autonomic nervous system comprises two antagonistic sets of nerves, the sympathetic and parasympathetic nervous systems. The sympathetic nervous system connects the internal organs to the brain by spinal nerves.

Nervous System Concept Map Answers | voucherslug.co

The nervous system is also divided functionally in terms of motor activities into the somatic and autonomic divisions. It is important, however, to recognize that these classifications are made for the sake of convenience and that the nervous system acts in an integrated manner both structurally and functionally.
