 Connecticut Department of Energy and Environmental Protection DEEP is continuing to carry out its mission and provide services while keeping both the public and our workforce safe during the COVID-19 pandemic. Click here for the latest updates on DEEP's response to COVID-19. DEEP COVID-19 Response

Quality Assurance and Quality Control – Connecticut  
 Quality Control in CT • Daily QC – Typically performed and recorded by technologist operator PRIOR to first patient of the day – Should be streamlined – both easy and fast to complete – Some method for recording results should be in place (easy & fast) – Electronic recording best – provides efficient method

CT Acceptance Testing & QC  
 Quality assurance is a comprehensive concept that comprises all of the oversight and management practices developed by the CT imaging team led by the supervising physician to ensure that : 1. Every imaging procedure is necessary and appropriate to the clinical problem at hand 2.

General Discussion -- Performing QA -- QC for CT Scan --  
 in CT QC! Provide technologists access to adequate training and continuing education in CT that includes a focus on patient safety ! Provide an orientation program for technologists based on a carefully established procedures manual ! Arrange staffing and scheduling so that adequate time is

CT QC Under the ACR QC Manual – Login Required  
 PET/CT QC/QA 1  
 Magnus Dahlbom, Ph.D. Division of Nuclear Medicine Ahmanson Biological Imaging Center& Ahmanson Translational Imaging Division David Geffen School of Medicine at UCLA Los Angeles Learning Objectives • Summarize the signal processing steps for coincidence detection • Understand the components of a daily QA procedure

PET/CT QC/QA  
 Record both the Mean CT Number and the standard deviation from the ROI into the QA data sheet. the outside of the . image . 6. Look at all the images from Series 1 (Helical), Series 2 & 3 (Axial) and also the last two series in which the phantom was raised off iso-center. Note if any of the images have artifacts.

Daily, Weekly, & Monthly QA Testing on CT Scanners  
 The CT Accreditation Program involves submission of clinical and phantom images, dose measurements and scanning protocols. Accreditation is required for providers that bill for CT under part B of the Medicare Physician Fee Schedule.

ACR CT Accreditation  
 A rigorous and ongoing quality assurance (QA) program for dual-modality positron emission tomog- raphy/computed tomography (PET/CT) systems is recommended to include an initial evaluation of scanner performance to establish a baseline of measurements and then periodic assessment of system performance of the scanners on an annual, semi-annual, quarterly, weekly, and daily basis.

PET/CT Acceptance Testing and Quality Assurance  
 The PET/CT Quality Control tests described in this publication adhere closely to the NEMA standard. As a supplementary training tool, 8 tutorial videos were produced, demonstrating, in practice, the procedures to perform the tests described in the IAEA Human Health Series No. 1 on Quality Assurance for PET and PET/CT Systems. Daily PET/CT QC test

Tutorial videos for Quality Control tests on PET/CT scanners  
 A daily quality control (QC) protocol for a GE 9800 computed tomography (CT) scanner is described which quantitatively assesses system noise, an index of high contrast resolution, and the reproducibility of CT numbers for four phantom materials.

CT quality control  
 This document is intended to provide guidance for performing Quality Control (QC) tests for CT. A detailed description of each required test follows in the order listed in TABLE 3. This is the same table that appears in the regulation at N.J.A.C. 7:28-22.7.
