Roger Tory Peterson, one of America's pre-eminent artist-naturalists and arguably the inventor of the field guide, made people love birds like no one since John James Audubon. A Field Guide to the Birds, first published in 1934, remains his most famous and wonderful work. The manual stood instantly apart from the dichotomous keys zoologists used to identify species, since Peterson grouped paintings of related species together and used arrows to, as he explained, "pinpoint the key field marks."
