Dietary Guidelines for Americans 2015-2020 provides the government's most up-to-date information on diet and health in order to help all children and their families consume a healthy, nutritionally adequate diet. Previous editions of the Dietary Guidelines focused primarily on individual dietary components of the food pyramid, such as dairy, meats, fruits, and vegetables. However, a growing body of new research has examined the relationship between overall eating patterns, health, and risk of chronic disease, and findings on these relationships are sufficiently well established to support dietary guidance. As a result, eating patterns and their food and nutrient characteristics are a focus of the recommendations in the 2015-2020 Dietary Guidelines. This edition provides guidelines for the seven million Americans who follow vegetarian diets;a number that has tripled in the last ten years. The information in the Dietary Guidelines is used in developing Federal food, nutrition, and health policies, educational materials, and programs. These guidelines are a necessary reference for policymakers and nutrition and health professionals, and a great resource for parents who strive to create a healthy lifestyle for their families. Additional audiences who may use Dietary Guidelines information to develop programs, policies, and communication for the general public include businesses, schools, community groups, media, the food industry, and State and local governments.

Food Fight is set during a 1991 Congressional hearing that evaluated the USDA's development of the Food Pyramid, a document that angered various agribusiness groups and some nutrition experts. This Open Access Reacting Game can be used in food and nutrition general education science courses and introductory chemistry and biology courses. Food Fight has also been used in courses that explore graphic representations of data and in public policy courses because it deals with conflicts of interest in government policy and the role of lobbyists and the press in those debates.
