Being healthy is much more than being physically fit and free from disease. Health is the state of well-being in which all of the components of health -- physical, emotional, social, mental, spiritual, and environmental -- are in balance. To be truly healthy, you must take care of all six components. - p. 11.

Infectious diseases are the leading cause of death globally, particularly among children and young adults. The spread of new pathogens and the threat of antimicrobial resistance pose particular challenges in combating these diseases. Major Infectious Diseases identifies feasible, cost-effective packages of interventions and strategies across delivery platforms to prevent and treat HIV/AIDS, other sexually transmitted infections, tuberculosis, malaria, adult febrile illness, viral hepatitis, and neglected tropical diseases. The volume emphasizes the need to effectively address emerging antimicrobial resistance, strengthen health systems, and increase access to care. The attainable goals are to reduce incidence, develop innovative approaches, and optimize existing tools in resource-constrained settings.

Preclinical Speech Science: Anatomy, Physiology, Acoustics, and Perception, Third Edition is a high-quality text for undergraduate and graduate courses in speech and hearing science. Written in a user-friendly style by distinguished scientists/clinicians who have taught the course to thousands of students at premier academic programs, it is the text of choice for instructors and students. Additionally, it is applicable to a broad range of courses that cover the anatomy and physiology of speech production, speech acoustics, and swallowing as well as those that cover the hearing mechanism, psychoacoustics, and speech perception. The material in this book is designed to help future speech-language pathologists and audiologists to understand the science that underpins their work and provide a framework for the evaluation and management of their future clients. It provides all the information students need to be fully ready for their clinical practicum training. KEY FEATURES: Describes scientific principles explicitly and in translational terms that emphasize their relevance to clinical practice.Features beautiful original, full-color illustrations designed to be instructive learning tools.Incorporates analogies that aid thinking about processes from different perspectives.Features "sidetracks" that contain clinical insights and relate interesting historical and contemporary facts to the discipline of speech and hearing science.Provides a framework for conceptualizing the uses, subsystems, and levels of observation of speech production, hearing, and swallowing.Includes material that is ideal for preparing both undergraduates and graduates for clinical study. NEW TO THE THIRD EDITION: Three new, up-to-date, and comprehensive chapters on auditory anatomy and physiology, auditory psychophysics, and speech physiology measurement and analysis.All chapters fully revised, including updated references and new full-color, detailed images.*Disclaimer: Please note that ancillary content (such as documents, audio, and video, etc.) may not be included as published in the original print version of this book.

This publication, prepared jointly by the WHO, the World Meteorological Organization and the United Nations Environment Programme, considers the public health challenges arising from global climate change and options for policy responses, with particular focus on the health sector. Aspects discussed include: an overview of historical developments and recent scientific assessments; weather and climate change; population vulnerability and the adaptive capacity of public health systems; the IPCC Third Assessment report; tasks for public health scientists; the health impacts of climate extremes; climate change, infectious diseases and the level of disease burdens; ozone depletion, ultraviolet radiation and health; and methodological issues in monitoring health effects of climate change.

Health Communication: Strategies and Skills for a New Era provides a practical process model for developing a health communication intervention. The book also explores exposure to media and how it shapes our conceptions of health and illness. Using a life stages and environments approach, the book touches on the patient role and how we 'hear' information from health care providers as well as guidance on how to be a thoughtful consumer of health information.

The construction industry has not had a good record on health and safety and faces tough legal and financial penalties for breaches of the law. This book provides a unique resource for all those who construct or procure the construction of projects of all sizes and in all countries and for clients who need to keep abreast of their own and their contractors' responsibilities. It gives practical guidance on best practice, including: * measuring performance and recording information * developing a safety policy and method statements * assessing risk * training and understanding people * the basics of the construction/environment interface The book addresses several topics not found in other reference works, discussing techniques of health and safety and basic environmental management as applied to the industry. It uniquely provides 50 quick reference guides setting out solutions to common problems. These include falls, manual and mechanical handling, work with asbestos and noise. It also summarises the main UK legal requirements on construction safety and health and includes a number of useful checklists and model forms. Written by a very experienced health and safety practitioner, who is also author of the highly successful IOSH book Principles of Health and Safety at Work, this book will be welcomed by all responsible for health and safety. It will also provide an excellent text for the NEBOSH (National Examination Board in Occupational Safety and Health) Construction Safety and Health national certificate. The author Allan St John Holt has twice been elected to the Presidency of the UK's professional body, the Institution of Occupational Safety and Health. He is a Fellow of the Institution and a Registered Safety Practitioner. An internationally-known lecturer and writer on safety management and other topics, he has presented seminars and featured as keynote speaker at conferences on every continent. Allan Holt's lifetime contribution to injury prevention was recognised in 1997, when he was inducted into the Safety and Health Hall of Fame International in Chicago, Illinois for services to international safety management. He is the only non-American to have been elected Chairman of the US National Safety Council's Construction Section (1991) and he received the Council's Distinguished Service to Safety Award in 2000. His current position as Head of Safety at Royal Mail Group follows his previous position as Global Director of Environment, Health and Safety for Bovis Lend Lease. Allan Holt has served as a Justice of the Peace since 1987. From reviews of the book 'The book is full of valuable advice and practical help in the form of checklists, assessment criteria and so on ... a fine addition to safety publications.' - Construction Manager 'Written by a long-experienced health and safety specialist ... this is an impressive and very satisfactory work.' - The RoSPA Occupational Safety & Health Journal Also of interest CDM Regulations Procedures Manual Stuart Summerhayes 1 4051 0740 5 Second edition Design Contribution to Health and Safety Management Stuart Summerhayes 1 4051 3275 2 Cover design by Simon Witter Photograph courtesy of FREECPD LIMITED www.thatconstructionsite.com

In an illustrated, accessible text, the author explains the life cycle of stars, from dense molecular clouds to the enigmatic nebulae some stars leave behind in their violent ends.
