DECEMBER2, 2020 (8/8/16) Page 6, just below the last displayed equation: Change $\int_{\mathbb{R}^n} f(x) dx$ to $\int_{\mathbb{R}^n} f(x) dx$, and in the next line, change $\int_{\mathbb{R}^n} f(x) dx$ to $\int_{\mathbb{R}^n} f(x) dx$. After (Fig. 1.4), insert $\int_{\mathbb{R}^n} f(x) dx$ with similar interpretations for the other charts. Introduction to Smooth Manifolds from John Lee is one of the best introduction books I ever read. I read most of this book, except for the appendices at the end and proofs of some corollaries. This book covers a couple of subjects: (*) First the theory of smooth manifolds in general (ch1, 2, 3, 4, 5 and 6), smooth maps, (co)tangent spaces, (co)vector fields and vector bundles.

This book is an introductory graduate-level textbook on the theory of smooth manifolds, for students who already have a solid acquaintance with general topology, the fundamental group, and covering spaces, as well as basic undergraduate linear algebra and real analysis. It is a natural sequel to my earlier book on topological manifolds [Lee00].
