Eine echte Entscheidungshilfe für alle, die sich für die Relevanz der Norm für das eigene Unternehmen informierten möchten.

Bachelor Thesis from the year 2017 in the subject Business economics - General, grade: 1,2, University of Applied Sciences Dresden, language: English, abstract: ISO 19600 is an international standard issued by the International Organization of Standardization (ISO) that aims at supporting organizations worldwide in introducing good compliance measures and maintain integrity. The standard was published in December 2014 and has received both praise and criticism, but no in-depth analysis of its effectiveness. This paper is set out to further analyze the approach offered by ISO 19600 towards compliance. It is supposed to assist cooperations in their decision whether or not to use ISO 19600 as their sole or main resource in implementing good compliance measures within their organization. The research question of this thesis could thus be stated as follows: How effective are the measures suggested by ISO 19600 in ensuring good compliance in a cooperation? The term „effectiveness“ is defined by the Oxford dictionary as "[t]he degree to which something is successful in producing a desired result". Therefore, this thesis is going to analyze the degree to which ISO 19600 is successful in producing the desired result of preventing compliance violations in cooperations. The research is based on findings of studies on compliance as well as the suggestions in popular literature on the topic and opinions voiced by various economists and organizations upon the release of ISO 19600 itself. By comparing those with the suggestions made in ISO 19600 it is possible to assess the standard's potential effectiveness when it is utilized by a cooperation. Note that ISO 19600 is aimed at all kinds of organizations including non-profit organizations and governmental institutions. The focus of this thesis lies on private, profit-driven enterprises, but most of the thesis' findings apply to other types of organizations as well.

This book guides readers through the broad field of generic and industry-specific management system standards, as well as through the arsenal of tools that are needed to effectively implement them. It covers a wide spectrum, from the classic standard ISO 9001 for quality management to standards for environmental safety, information security, energy efficiency, business continuity, laboratory management, etc. A dedicated chapter addresses international management standards for compliance, anti-bribery and social responsibility management. In turn, a major portion of the book focuses on relevant tools that students and practitioners need to be familiar with: 8D reports, acceptance sampling, failure tree analysis, FMEA, control charts, correlation analysis, designing experiments, estimating parameters and confidence intervals, event tree analysis, HAZOP, Ishikawa diagrams, Monte Carlo simulation, regression analysis, reliability theory, data sampling and surveys, testing hypotheses, and much more. An overview of the necessary mathematical concepts is also provided to help readers understand the technicalities of the tools discussed. A down-to-earth yet thorough approach is employed throughout the book to help practitioners and management students alike easily grasp the various topics.

This handbook is the first resource to provide a scientific analysis of the nature of compliance. It examines the subject from such crucial and varied perspectives as ethics, behavioral science, risk management, accounting, and European and international law. Much more than a critical approach to the existing practice of supervision, it provides a wealth of information, guidance, and valuable insights for the day-to-day work of compliance officers. With chapters contributed by lecturers of VU University Amsterdam's flourishing post-doctoral Executive Master Program in Compliance and Integrity Management – which fosters alternatives such as greater trust in self-regulation and market discipline – the book explores such aspects of compliance and integrity management as the following: • monitoring risk compliance and integrity; • stakeholder and reputation management; • conflicts of interest; • anti-bribery; • export controls; • extraterritorial jurisdiction of U.S. legislation; • fraud; • duty of care; • market abuse; • privacy; and • competition. The analysis throughout is supported by a comprehensive study of the literature concerning the raison d'être of supervision and regulation. Meeting the need for an in-depth analysis of the expanding field of compliance and integrity management, this book is a milestone in a field that is rapidly growing in importance across a wide spectrum of business and professional activity. It will prove an essential practical resource for company or institutional officers worldwide in setting up a compliance function in their organization. Well known as a consultant in compliance-related matters, Sylvie C. Bleker-van Eyk is currently Senior Director at PricewaterhouseCoopers Forensic Services, Chair of the Supervisory Committee on Monitoring Anti-Money Laundering Policy at WODC, the Research and Documentation Centre of the Netherlands Ministry of Security and Justice, and Professor and Program Director of Postgraduate Education in Compliance and Integrity Management at VU University Amsterdam. Raf A. M. Houben is Head of Compliance and Security at HDI Global SE-The Netherlands in Rotterdam, and program coordinator and lecturer at the same Postgraduate Education in Amsterdam.

The book contains diverse topics such as stock valuation, risk management, gender diversity, work place spirituality, consumer behaviour, etc.
