This is a term in AP Psychology that defines itself: we learn behaviors by observing others. Put another way, we imitate or model those behaviors through our perceptions of others. We might observe a person walk, talk, or do something in a particular way, and then find ourselves doing that very behavior, even when it was not directly taught to us.

What's in This AP Psychology Study Guide? This guide will help you study for the AP Psychology exam and other assessments in your class by providing study strategies and other resources that pertain to the material covered in the course. In the first section, you'll learn how to create a study plan for the exam that supports your needs as a student. This section applies exclusively to the final AP exam, so it's less relevant if you're just studying for an in-class test.

### Learning Ap Psychology Study Guide Answers

The psychology of learning focuses on a range of topics related to how people learn and interact with their environments. One of the first thinkers to study how learning influences behavior was psychologist John B. Watson who suggested that all behaviors are a result of the learning process. The school of thought that emerged from Watson's work was known as behaviorism.
