types of operating such as Real Time Operating Systems and MultiMedia OS's. Finally there are some chapters which the authors call case studies. In these, one chapter goes into a detailed discussion of Linux, another chapter covers Windows XP. These include: Atlas, XDX-940, THE, RC 4000, CTSS, MULTICS, OS/360, and MACH, along with brief mentions of several others. Note that this not a book on how to use operating systems, this is a book on how operating systems are designed. It is intended for upper level undergraduate students or first year graduate students.
