This volume is the result of an EU project involving two different European countries (Italy and Cyprus) on risk and needs assessment for juvenile violent offenders. The book is based on a longitudinal data base of juveniles who have committed violent crimes and who have been followed up after six months to measure their recidivism rate. The aim of this book is to provide practitioners who are

Violent Offending (violent) dealing with juvenile offenders, with scientifically-based theories and knowledge derived from results about risk assessment. In particular it shows how a newly developed and tested instrument/approach, the EARN (European Assessment of Risk and Needs) works and how it can be used to help practitioners. Recidivism of violence in juveniles is based on several risk factors and is reduced on the basis of protective factors. Efficient legal intervention and treatment are more and more tailored according to the risk factors but also to the needs of juveniles. Juvenile Justice Systems in Europe tend to approach the juvenile who has committed a crime not only from a sanction point of view but more as an opportunity for the juvenile, his or her family and the social context in

"This book describes violence risk assessment in both juveniles and adults, incorporating dynamic and static factors, along with treatment alternatives. Research and practice are combined quite nicely, along with assessment and treatment. There is something for everyone here." Score: 91, 4 stars --Doody's "Forensic clinicians will find this book to be a valuable reference book as well as a very useful clinical treatment guide relevant to violent offenders." --Jeffrey L. Violent Offending offenders pose to the general public. This comprehensive volume provides practitioners with the knowledge and insight necessary to conduct violence risk assessments, and to synthesize clinical and research data into comprehensive reports and oral testimony. Violence risk assessment requires a well-formulated and comprehensive risk management plan. Andrade and the authors present that plan, and demonstrate how it can be clearly implemented in practice. With numerous clinical case studies, this book illustrates the process of conducting violence risk assessments, outlines the tools used in these evaluations, and explains how information is translated into an overall assessment and guide for future risk management. Key Features:
