Excerpt from Guide Specifications and Reference Specification System A construction project specification is a legal document setting forth all the requirements for one project. The construction project specification does not usually include drawings or symbols, but describes all of the work statements that augment a drawing which gives the requirements for quality, testing, installation methods, and other factors Federal construction

Read Online Technical Specification For

mandates maximum full and free competition and the awarding of contracts to the lowest bidder. These factors along with the policy of Federal agencies to use generic specifications creates a difficult atmosphere for preparation of quality construction project specifications. Thus, Federal construction project specifications require more detailed and precise wording than specifications for commercial construction projects. Federal construction project specifications are based on guide specifications. Without available applicable guide specifications, it would be necessary to provide a complete description of the material and the installation in such terms that only one, or a very small number, of products can be supplied in accordance with the

Read Online Technical Specification For

specifications. This procedure would result in contract specifications that would be contrary to Federal policy. Clearly, the most desirable approach for preparing construction specifications is to use guide specifications. This approach will facilitate the incorporation of state-of-the-art materials and construction methods which will enhance the quality of construction. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In Specifications for Building Conservation, the National Trust draws on a range of case studies and specifications to provide a much needed guide to specification writing for building conservation. Although traditional building accounts for approximately a quarter of all buildings in the UK, the old skills and understanding required for their care and maintenance have been

Read Online Technical Specification For

increasingly eroded over the last century. As the largest heritage charity in Europe, the National Trust has a first class reputation for high standards of conservation and care, and in this three volume set, the Trust brings together a remarkable pool of expertise to guide conservation professionals and students through the process of successful specification writing. This first book focusses on the materials used for the external fabric, detailing successful approaches employed by the National Trust at some of their most culturally significant sites. A range of studies have been carefully selected for their interest, diversity and practicality; showcasing projects from stonework repairs on the magnificent Grade I listed Hardwick Hall to the re-thatching of the traditional cottages of

Read Online Technical Specification For

the Holnicote Estate. Complete with a practical Conservation Management Plan checklist, this book will enable practitioners to develop their skills, allowing them to make informed decisions when working on a range of project types. This is the first practical guide to specification writing for building conservation and the advice provided by the National Trust experts will be of interest to any practitioners and students involved in building conservation, both in the UK and beyond. Profits generated from the sale of this publication will go to the National Trust Building Apprenticeship Scheme. This provides placements for traditional skills at National Trust properties.

Offers an equitable set of contract provisions for the administration of

Construction with, and following the principles set out in, the ISO 14000 series of International Standards.

This synthesis will be of interest to administrators, including contract and specifications administrators; research, construction, materials, specification, and design engineers; agency project managers and staff; and highway construction contractors. It describes the state of the practice with respect to the development and present status of performance-related specifications (PRS) for highway materials and construction. This report of the Transportation Research Board summarizes the historical events that have prompted U.S. interest in PRS development and describes the underlying concepts. In addition, it describes current practice

Read Online Technical Specification For

with regard to PRS implementation and refers to the principal PRS literature with emphasis on performance and cost models. It emphasizes the utility of PRS in providing objective/ rational measures that can be used for special contract conditions, such as incentive or disincentive adjustments.
