The clear-cellulose-tape preparation is the most widely used procedure for the detection of human pinworm infections ( 1 , 2 , 3 ). Adult *Enterobius vermicularis* worms inhabit the large intestine and rectum; however, the eggs are not normally found in fecal material. The adult female migrates out the anal opening and deposits the eggs on the perianal skin, usually during the night.

Humans suffer from numerous parasitic foodborne zoonoses, many of which are caused by helminths. The helminth zoonoses of concern in this book were once limited to diseases of animals, but have now become transmissible to humans. This book reviews not only the prevalence and distribution of these zoonoses, including available health and economic impact data, but highlights gaps in our knowledge that must be filled in order to assess the importance of a particular zoonosis.

Infections caused by parasites are still a major global health problem. Although parasitic infections are responsible for a significant morbidity and mortality in the developing countries, they

are also prevalent in the developed countries. Early diagnosis and treatment of a parasitic infection is not only critical for preventing morbidity and mortality individually but also for reducing the risk of spread of infection in the community. This concise book gives an overview of critical facts for clinical and laboratory diagnosis, treatment and prevention of parasitic diseases which are common in humans and which are most likely to be encountered in a clinical practice. This book is a perfect companion for primary care physicians, residents, nurse practitioners, medical students, paramedics, other public health care personnel and as well as travelers.

Presents the A to Z of human parasitology for MBBS students. All parasites afflicting humans all over the globe are mentioned in detail for the students and teachers of parasitology. An excellent textbook for not only medical students but also the students of allied health sciences, nursing, paramedical courses, etc.
