This guide for novices with some experience offers the chance to advance to the next level. Detailing two of the most popular styles of calligraphy, this text features well-illustrated, step-by-step instructions by an expert calligrapher, from the basics to tips on texture and color.

Language, literature and biography.  
This book provides a short and accessible introduction to the field of gender history, one that has vastly expanded in scope and substance since the mid 1970s. Paying close attention to both classic texts in the field and the latest literature, the author examines the origins and development of the field and elucidates current debates and controversies. She highlights the significance of race, class and ethnicity for how gender affects society, culture and politics as well as delving into histories of masculinity. The author discusses in a clear and straightforward manner the various methods and approaches used by gender historians. Consideration is given to how the study of gender illuminates the histories of revolution, war and nationalism, industrialization and labor relations, politics and citizenship, colonialism and imperialism using as examples research dealing with the histories of a number of areas across the globe. Written by one of the leading scholars in this vibrant field, What is Gender History? will be the ideal introduction for students of all levels.

Discover fresh, forgiving techniques that promise less frustration and juicier results! Julie Gilbert Pollard subscribes to the "whatever works" school of painting. Not bound by tradition, she shows you how to unleash your watercolors for exciting and expressive results...and have lots of fun doing it! See how a few simple steps at the beginning can preserve the lights, lock in the darks, and allow you greater freedom to let your watercolor do what it does best: move and flow wet-into-wet, creating luminous layers of depth and vitality. Inside you'll find: 9 step-by-step painting demonstrations, plus many more quick lessons illustrating basic techniques. How to paint water, rocks, trees and other landscape elements in a lively manner. Easy techniques for making your paintings pop, including tips for successful spattering. How to combine a representational painting style with abstract acrylic underpaintings for unique and lively results. This book is all about painting boldly, embracing the medium's unpredictable nature, and achieving a loose, painterly quality. It's ideal for the beginner trying to get off on the right foot, as well as the intermediate artist looking for ways to "freshen up" their approach.

This book insures the legacy of the original 1950 classic, Process Heat Transfer, by Donald Q. Kern. This second edition book is divided into three parts: Fundamental Principles; Heat Exchangers; and Other Heat Transfer Equipment/ Considerations. - Part I provides a series of chapters concerned with introductory topics that are required when solving heat transfer problems. This part of the book deals with topics such as steady-state heat conduction, unsteady-state conduction, forced convection, free convection, and radiation. - Part II is considered by the authors to be the "meat" of the book - addressing heat transfer equipment design procedures and applications. In addition to providing a more meaningful treatment of the various types of heat exchangers, this part also examines the impact of entropy calculations on exchanger design. - Part III of the book examines other related topics of interest, including boiling and condensation, refrigeration and cryogenics, boilers, cooling towers and quenchers, batch and unsteady-state processes, health & safety and the accompanying topic of risk. An Appendix is also included. What is new in the 2nd edition Changes that are addressed in the 2nd edition so that Kern's original work continues to remain relevant in 21st century process engineering include: - Updated Heat Exchanger Design - Increased Number of Illustrative Examples - Energy Conservation/ Entropy Considerations - Environmental Considerations - Health & Safety - Risk Assessment - Refrigeration and Cryogenics - Inclusion of SI Units

When her post office burns down, postmistress Veronique starts lobbying for its replacement. But her fellow residents of the small commune of Fogas in the French Pyrenees are too preoccupied to rally to her cause. Mayor Serge Papon, overwhelmed by grief at the death of his wife, has lost his joie de vivre and all taste for village politics (and croissants) and it seems as though deputy mayor Christian (whose tendresse for Veronique makes him her usual champion) will soon be saying au revoir to the mountain community. And to Sarko the bull. Add to this a controversial government initiative to reintroduce bears to the area and soon the inhabitants are at loggerheads, threatening the progress of the sacred Tour de France and the very existence of Fogas itself. In yet another tale with more ups and downs than a Pyrenean horizon, things are about to get grizzly.

These transcripts of wiretapped conversations between Nazi officers reveal "a fascinating—and chilling—insight into the German view of the war" (Financial Times). Between 1939 and 1942, the British Directorate of Military Intelligence created a number of POW interrogation camps in and around London where they secretly recorded private conversations between senior German staff officers. In this extraordinary work, historian Sonke Neitzel examines these transcripts in depth and presents the private thoughts, opinions, and secrets of Nazi officers during the Second World War. These transcripts address important questions regarding the officers' attitudes towards the German leadership and Nazi policies: How did the German generals judge the overall war situation? From what date did they consider it lost? How did they react to the attempt on Hitler's life in July 1944? What knowledge did they have of the atrocities? By turns insightful and horrifying, this unprecedented research is a must for any serious scholar of the period. "A goldmine of information about what the German High Command privately thought of the war, Adolf Hitler, the Nazis and each other." —Daily Mail

Demonstrates the making of a Radiant Star quilt from start to finish using speed quilting methods.  
American Muslim religious liberty lawyer Asma Uddin has long considered her work defending people of all faiths to be a calling more than a job. Yet even as she seeks equal protection for Evangelicals, Sikhs, Muslims, Native Americans, Jews, and Catholics alike, she has seen an ominous increase in attempts to criminalize Islam and exclude Muslim Americans from those protections.Somewhat, the view that Muslims aren't human enough for human rights or constitutional protections is moving from the fringe to the mainstream—along with the claim "Islam is not a religion." This conceit is not just a threat to the First Amendment rights of American Muslims. It is a threat to the freedom of all Americans.Her new book reveals a significant but overlooked danger to our religious liberty. Woven throughout this national saga is Uddin's own story and the stories of American Muslims and other people of faith who have faced tremendous indignities as they attempt to live and worship freely.Combining her experience of Islam as a religious truth and her legal and philosophical appreciation that all individuals have a right to religious liberty, Uddin examines the shifting tides of American culture and outlines a way forward for individuals and communities navigating today's culture wars.
