This multiculturalism has a huge impact on many aspects of society, but especially on the healthcare system. Transcultural nursing seeks to provide care that acknowledges an individual's culture, values, beliefs and practices — the crux of which is good communication between the health professional and the patient and their family.

Transcultural Communication in Nursing, Second Edition, is designed to help students and practicing professionals increase their self-awareness by recognizing possible biases and becoming more sensitive to cultural differences. This new edition gives examples of exchanges between the nurse and patients who hold various cultural values and beliefs. Latinos, Hispanics, Muslims, Hasidic and Reform Jews, Filipinos, Native Americans, and African Americans are just some of the ethnic and religious groups whose traditions are explored. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The second edition of Transcultural Communication In Nursing focuses on providing general principles of transcultural communication as well as practical examples. It is intended as a supplemental book for the practicing nurse and learner. the practical breakdown of sections make this book a quick and easy read: Part One: Core Principles (how does one conduct a critical assessment, what does one look for/ask, avoid judgments), Part Two: Cultural Assessment resources and tools (interview guidelines), and Part Three: Practical Resources including a spanish-english listing for communications.

Paperback edition of a guide to the issues and problems faced by health professionals when they communicate with their clients and patients from different linguistic and cultural backgrounds. Offers many practical solutions and strategies for dealing with cultural and linguistic issues and problems in health care settings. Includes a bibliography and index. The author is the former director of the Language and Society Centre of the National Languages and Literacy Institute of Australia. She now holds the foundation chair in Linguistics at the University of New England.

For healthcare providers, the key to bonding with patients is to have a greater awareness of cultural differences. The more you know about your patient's culture, the easier it is for them to feel comfortable--with you and their treatment. You don't want to lose a patient because you said something that you didn't even know was offensive or that was simply mistaken for meaning something else. In Pulling Wisdom: Filling the Gaps of Cross-Cultural Communication for Healthcare Providers, Dr. Cathy Hung shares tips for seeing beyond cultural stereotypes, raising your cultural competency, and bridging the communication gaps between you and your patients to improve your practice success. She also introduces concepts and tools such as The Amalgamation Scale, which can predict and assess potential obstacles based on the cultural and language barriers between provider and patient.

When healthcare providers and patients do not speak the same language, medical interpreters are called in to help. In this book - the first ever ethnographic study of a bilingual hospital - Claudia Angelelli explores the role of medical interpreters, drawing on data from over 300 medical encounters and interviewing the interpreters themselves about the people for whom they interpret, their challenges, and how they characterize their role. Traditionally the interpreter has been viewed as a language conduit, with little power over the medical encounter or the relationship between patient and provider. This book presents an alternative view, considering the interpreter's agency and contextualizing the practice within an institution that is part of a larger society. Bringing together literature from social theory, social psychology and linguistic anthropology, this book will be welcomed by anyone who wants to discover the intricacies of medical interpreting firsthand; particularly researchers, communication specialists, policy makers and practitioners.

Primary Care physicians often run into unexpected cultural obstacles when dealing with patients of different ethnicities. This book includes information essential to physicians' understanding in the treatment of African Americans, Latinos, Asian Americans, Native Americans and Arab and Muslim Americans. Other chapters address issues of spirituality and religion in medicine and caring for immigrant populations.

This book provides insights into the complexities of multicultural relations in health care and demystifies the many cultural influences on health and health care to achieve its ultimate goal - to help people get the most they can out of health care and facilitate the promotion of public health.

This book examines interpreter-mediated medical encounters and focuses primarily on the phenomenon of bilingual health care. It highlights the interactive and coordinated nature of interpreter-mediated interactions. Elaine Hsieh has put together over 15 hours of interpreter-mediated medical encounters, interview data with 26 interpreters from 17 different cultures/languages, 39 health care providers from 5 clinical specialties, and surveys of 293 providers from 5 clinical specialties. The depth and richness of the data allows for the presentation of a theoretical framework that is not restricted by language combination or clinical contexts. This will be the first book of its kind that includes not only interpreters' perspectives but also the needs and perspectives of providers from various clinical specialties. Bilingual Health Communication presents an opportunity to lay out a new theoretical framework related to bilingual health care and connects the latest findings from multiple disciplines. This volume presents future research directions that promise development for both theory and practice in the field.

How do you perceive your cultural identity? All of us are shaped by the cultures we interact with and the cultural backgrounds and ethnicities that are part of our heritage. Take a dynamic approach to the study of culture and health care relationships. Dr. Marilyn A. Ray shows us how cultures influence one another through inter-cultural relationships, technology, globalization, and mass communication, and how these influences directly shape our cultural identities in today's world. She integrates theory, practice, and evidence of transcultural caring to show you how to apply transcultural awareness to your clinical decision making. Go beyond common stereotypes using a framework that can positively impact the nurse-patient relationship and the decision-making process. You'll learn how to deliver culturally competent care through the selection and application of transcultural assessment, planning and negotiation tools for interventions.
